

MOBIH SEO URL FOR OPENCART 1.5.X INSTALLATION GUIDE

This is an installation guide for OpenCart 1.5.X

1. Go to /catalog/controller/common/ , renaming **seo_url.php** to **seo_url.php.bak**. Then, upload file seo_url.php in catalog folder to your hosting/server
2. Login to your OpenCart Administration. Click to menu System > Setting > Edit your store – Click to Server tab, In SEO URLs option select Yes then click Save. (Image Below)

3. Please upload a file **.htaccess** to your server in OpenCart folder (not nessecary if you already have one)
4. Import file **sample.sql** via phpMyAdmin. Edit the table prefix on the words ``mobihouse_url_alias`` to ``yourprefix_url_alias``.

5. Please check your store for example affiliates menu, account, etc..
6. Edit your category or product via administration. Click menu Catalog > Category/Product – Edit the selected category/product – click Data tab – find SEO keyword and type your SEO keyword (Recommend use form: **your-name**)

SEO Keyword:

Follow the form below, you could
set wrong anything but not with
this, remember that!
The form will look like this:
"application-name", for example:
Mobi House -> mobi-house.

angry-birds-space

Demo: <http://mobihouse.tk/android/>

Good Luck!
